Mumbai's Trusted IT Disposal Partner

MUMBAI · NAVI MUMBAI
THANE · PUNE

— ENTERPRISE IT ASSET DISPOSITION

Retire your IT the way you'd want it **audited.**

Certified data destruction, asset recovery and compliant disposal — managed end to end, documented at every step. One partner, one point of contact.

Corporate Profile · 2026

[Request a free assessment](#)

Collection Partner of Green Life E Waste Recycling Pvt Ltd — MPCB-authorised, ISO-certified processing.

As a bulk consumer, retiring IT is your liability — not the vendor's.

§

The obligation is yours

Under India's E-Waste Rules, the bulk consumer must channel end-of-life IT to an authorised recycler and keep the records. A scrap-dealer receipt doesn't discharge it.

!

The data is still there

A deleted or reformatted drive still holds recoverable information long after the device leaves your floor.

?

No document, no defence

When an auditor asks what happened to a specific machine, a recollection isn't proof — you need a manifest and a certificate.

The hardware leaves. The liability doesn't — until you can prove where it went.

One partner for the entire end-of-life of your IT.

From the first pickup to the final certificate — secure data destruction, maximum value recovery and compliant recycling, run by one team you can actually reach.

01 · SECURE

Data is the real asset

Certified destruction comes first — before recycling, resale or anything else. Your information is retired before your hardware is.

02 · COMPLIANT

Documentation that holds up

Every collection is backed by a statutory manifest and a recycling certificate, built to sit in an audit file.

03 · SUSTAINABLE

Responsible by default

Assets are processed through a licensed, MPCB- authorised channel — not handed to an informal vendor.

Secure. Compliant. Sustainable — in that order, because that's the order your risk actually runs in.

— TRUSTED BY

The channel behind some of India's most **data-sensitive** names.

Credentials you can **verify**.

Held and maintained by our processing partner, **Green Life E Waste Recycling Pvt Ltd** — MPCB-authorised and ISO-certified. Tap any badge to open the certificate on our website.

Four services, **one** documented process.

Not four vendors and four paper trails — a single managed lifecycle, with one contact and one record from pickup to certificate.

IT Asset Disposition

End-to-end retirement of laptops, desktops, servers and networking equipment.

[Learn more →](#)

Certified Data Destruction

Software wiping or physical destruction, documented for every job.

[Learn more →](#)

Asset Recovery

Maximising recoverable value from retired hardware before disposal.

[Learn more →](#)

Corporate Buyback

Structured buyback for bulk device-refresh cycles.

— WHAT WE HANDLE

5 or 500. We take it all.

Working, dead, or somewhere in between — from a single laptop to a full data-centre refresh. Send us the list; we arrange the pickup.

Computers & Displays

Laptops · desktops · monitors · servers

Network & Power

Routers · switches · UPS · printers

Components

RAM · drives · PCBs · circuit boards

Devices & Peripherals

Phones · tablets · keyboards · mice

From pickup to proof — **six steps.**

01 **Assessment**

We scope device types, volume, condition and timeline before anything moves.

02 **Pickup**

Your assets are collected from your premises on the agreed date.

03 **Secure transport**

Material moves under chain-of-custody from your site to the facility.

04 **Data destruction**

Drives are wiped or physically destroyed as your policy requires.

05 **Certification**

You receive the manifest and recycling certificate for your file.

06 **Value recovery**

Recovered value from resaleable assets offsets your cost.

No chasing four vendors and four paper trails. **One pickup, one point of contact, one record** — from the moment your assets leave the floor to the certificate in your file.

See the full process on privacy.in →

Proof you can put in a file.

Two documents accompany every job — the record an IT, procurement or audit team needs to show exactly what left the building and where it went.

Certificate of E-Waste Recycling

Confirms the weight recycled and environment-friendly disposal under the E-Waste Rules, 2022 — issued once your assets are processed.

Form-6 E-Waste Manifest

The statutory movement document (Rule 19) that travels with your assets from pickup to the authorised facility — your chain-of-custody record.

Samples shown for reference. Live documents are serialised, dated and specific to your batch.

Copper & aluminium furnace

Green Life E Waste Recycling Pvt Ltd — Plot 11, Karodi, Waluj MIDC, Chhatrapati Sambhajnagar.

Built for data-sensitive industries.

The device list is the same across sectors; the exposure is not. These are the environments where a documented disposal trail earns its place.

Banking & NBFCs

Customer financial data on a retired laptop is a regulator's first question.

Insurance

The same data sensitivity as banking, the same need for certified proof.

IT & Software

Source code and client credentials — the assets on your machines are the product.

BPOs & Call Centres

High device turnover meets high call-data sensitivity.

Pharma & Manufacturing

Compliance-driven environments where audit trails aren't optional.

Education

Computer labs retiring in batches, with student records at risk.
