— ENTERPRISE IT ASSET DISPOSITION (ITAD) —

# Retire your IT the way you'd want it audited.

IT asset disposition, certified data destruction, corporate buyback and compliant e-waste recycling for enterprises across India. One team, one documented process, from the first pickup to the final certificate.

IT Asset Disposal

Certified Data Destruction

Corporate IT Buyback

Server & Data Centre Decommissioning

E-Waste Recycling

Corporate Profile · 2026

[Request a free assessment](#)

The Enterprise ITAD Division of Greenlife Ewaste Recycling Pvt. Ltd. · MPCB-authorised, ISO 27001, 9001, 14001 and 45001 certified.

# As a bulk consumer, retiring IT is **your liability**, not the vendor's.

## §

### The obligation is yours

Under India's E-Waste (Management) Rules, 2022, a bulk consumer must channel end-of-life IT to an authorised recycler and keep the records. A scrap dealer's receipt does not discharge it.

## !

### The data is still there

A deleted or reformatted drive still holds recoverable information long after the device leaves your floor. Degaussing does nothing to an SSD.

## ?

### No document, no defence

When an auditor asks what happened to a specific machine, a recollection is not proof. You need a manifest and a certificate.

**The hardware leaves. The liability stays until you can prove where it went.**

# One company for the entire end of life of your IT.

PrivAce Technologies is the Enterprise ITAD Division of Greenlife Ewaste Recycling Pvt. Ltd., an MPCB-authorised, ISO-certified e-waste recycler with its own processing facility in Waluj MIDC. We are not a broker passing your assets to someone else. Collection, data destruction, valuation, buyback and recycling all happen within one company.

## 01 · SECURE

### Your data retires first

Certified destruction happens before recycling, resale or anything else. Software wiping with licensed Blancco and BitRaser, degaussing or physical shredding, following NIST SP 800-88 guidelines.

## 02 · COMPLIANT

### Documentation that holds up

A Form 6 E-Waste Manifest signed at pickup, a Certificate of E-Waste Recycling, and data destruction certificates with device-level detail when your audit requires it.

## 03 · SUSTAINABLE

### Recovered, never dumped

Working assets are refurbished and resold. Everything else is recycled at our MPCB-authorised facility under environmentally sound methods, never an informal channel.

**15**

enterprise ITAD services under one roof

**497**

cities served across India

**660 MT/A**

MPCB-authorised e-waste capacity

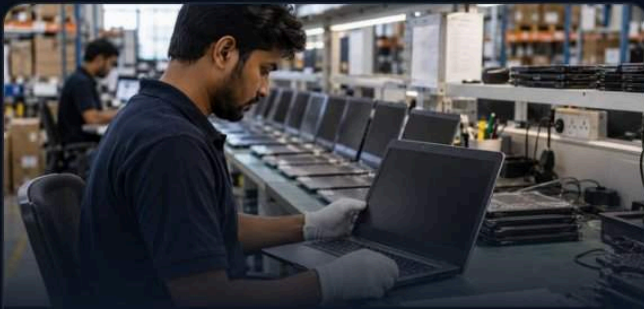

**5 to 500+**

units per pickup, any condition

**Secure First. Compliant Always. Sustainable Because It Should Be.**

# Four stages, **one** documented process.

Most vendors run data destruction, resale and recycling as separate errands with separate paperwork. We run them as one lifecycle, with one chain of custody and one set of audit-ready documents.

## RECOVER VALUE

### Corporate IT Buyback

Device-level valuation for laptops, desktops, servers and networking gear, priced per device and not per kilo. Payment reaches you before we collect.

[Learn more →](#)

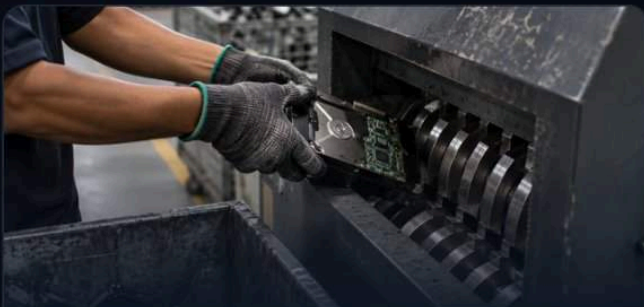

## DISPOSAL

### IT Asset Disposition

The full documented retirement process for all IT equipment, working or dead, as one coordinated pickup with one point of contact.

[Learn more →](#)

## DATA DESTRUCTION

### Certified Data Destruction

Software wiping, degaussing or physical shredding, onsite at your premises or offsite at our facility, with certificates issued for every job.

[Learn more →](#)

## INFRASTRUCTURE

### Server & Data Centre Decommissioning

Rack teardown, SAN and NAS arrays, tape libraries and UPS batteries, scheduled to your change window with every drive counted.

[Learn more →](#)

# Fifteen services. **One** point of contact.

Every service below has its own page on [privace.in](https://privace.in) with the process, the documentation and the honest limitations.

## RECOVER VALUE

### Sell Your Old IT Assets →

Device-level valuation, data destroyed first, payment before we collect.

### Corporate Buyback →

Structured bulk buyback for scheduled refresh cycles, priced per device.

### Asset Recovery →

Residual value assessed after data destruction, so value returns without the data.

### Corporate Laptop Recycling →

Bulk laptop retirement, working, dead or mixed condition.

## DISPOSAL

### IT Asset Disposition →

End-to-end documented retirement of all IT equipment.

### Corporate E-Waste Pickup →

Free scheduled collection, Form 6 Manifest signed before the vehicle leaves.

## DATA DESTRUCTION

### Certified Data Destruction →

The full destruction service and the documents your auditor asks for.

### Data Sanitization →

Clear, Purge or Destroy under NIST SP 800-88 guidelines.

### Hard Drive Destruction →

All three methods compared, matched to the media they work on.

### Hard Drive Shredding →

HDD, SSD, NVMe, tape and optical, particle size matched to media.

### Degaussing Services →

Magnetic erasure for hard disks and tape. Not for SSDs.

### Certified Data Wiping →

Licensed Blancco and BitRaser erasure, certified per drive.

## INFRASTRUCTURE & LOGISTICS

### Server Decommissioning →

Server rooms and smaller estates, every drive counted before removal.

### Data Centre Decommissioning →

Racks, SAN/NAS, tape libraries, UPS batteries, to your change window.

### Reverse Logistics →

Multi-site collection with one contact and one consolidated document set.

# Those 200 laptops in your storeroom are worth money.

Retired enterprise hardware is rarely worthless. It is usually just untracked. Our corporate buyback programme turns a refresh cycle into a budgeted offset against new hardware spend.

- **Priced per device, not per kilo.** Every asset is inspected and valued on its model, configuration and condition.
- **Payment before pickup.** Once the valuation is agreed, the amount reaches your account before we collect.
- **Data destroyed first.** Every device is wiped or destroyed before resale, with certificates for your file.
- **Faster at every step.** Quicker assessment, quicker pickup and quicker payment.
- **Built for refresh cycles.** Bulk pricing planned around your refresh calendar, not renegotiated asset by asset.

## What we buy back

Laptops, desktops, all-in-ones, monitors, rack and tower servers, storage arrays, switches, routers and firewalls. Working units carry the most value.

## What does not sell

Is still collected, wiped or destroyed and recycled responsibly under the same documented process, in the same pickup.

[Get a valuation](#)

# Deleting the files isn't enough. We **prove** it's gone.

The data is the real risk, not the hardware. We match the method to the media and to your compliance requirement, following **NIST SP 800-88 guidelines**, and document every job.

| METHOD                | MEDIA                         | DRIVE SURVIVES?               | DOCUMENTATION                                                         |
|-----------------------|-------------------------------|-------------------------------|-----------------------------------------------------------------------|
| Certified data wiping | HDD, SSD, NVMe                | Yes, reusable                 | Blancco or BitRaser erasure certificate per drive, issued on the spot |
| Degaussing            | HDD and magnetic tape         | No, drive is permanently dead | Destruction certificate. Not effective on SSDs                        |
| Physical shredding    | HDD, SSD, NVMe, tape, optical | No                            | Destruction certificate, particle size matched to the media           |

## Onsite destruction

We destroy drives at your premises while your team watches, and certificates are issued before we leave. Built for banks and regulated firms whose policy does not allow media to leave the building.

## Offsite destruction

Media travels under a signed Form 6 manifest to our MPCB-authorized facility in Waluj MIDC, where it is wiped, degaussed or shredded and certified.

One consistent standard, **whatever the media.**

# 5 or 500. We take it all.

Working, dead or somewhere in between, from a single laptop to a full data centre. If it plugs in and served your business, send us the list and we arrange the pickup.

## Computers & Displays

Laptops · desktops · all-in-ones · monitors · servers

## Network & Power

Routers · switches · UPS · UPS batteries · printers

## Components

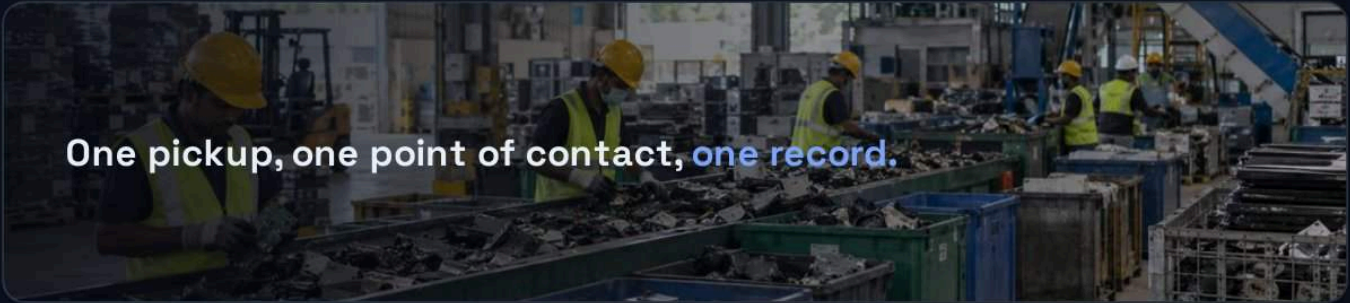

RAM · hard disks · SSDs · PCBs · circuit boards

## Devices & Peripherals

Phones · tablets · keyboards · mice

# From pickup to proof, **six steps.**

One pickup, one point of contact, **one record.**

## 01 Assessment

Share your device list.  
We scope types,  
volume, condition and  
location, usually within  
24 to 48 hours.

## 02 Valuation

Resaleable assets are  
valued per device. For  
buyback, the agreed  
amount is paid before  
pickup.

## 03 Pickup

Free, scheduled  
collection. The Form 6  
E-Waste Manifest is  
signed before the  
vehicle leaves.

## 04 Data destruction

Wiping, degaussing or  
shredding, onsite at your  
premises or offsite at  
our facility.

## 05 Recycling

End-of-life material is  
dismantled and recycled  
at our MPCB-authorized  
plant.

## 06 Certification

Your Certificate of E-  
Waste Recycling and  
data destruction  
certificates, for your file.

No chasing separate vendors for wiping, resale and recycling. **You send the list. We handle the rest,** from the moment your assets leave the floor to the certificate in your file.

See the full process on [privace.in](https://privace.in) →

# Proof you can put in a file.

Every job produces the record your IT, procurement, audit or sustainability team needs to show what left the building, when, and through which licensed channel.

# We own the plant. No middlemen.

Your assets are processed at our own MPCB-authorized recycling facility, not a scrap yard. Trained, PPE-equipped teams dismantle, shred and recover every device under environmentally sound methods.

**Greenlife Ewaste Recycling Pvt. Ltd.** · Plot No. 11, Gut No. 40, Karodi, Waluj MIDC, Chhatrapati Sambhajnagar, Maharashtra 431136

— TRUSTED BY

# The ITAD partner behind some of India's most **data-sensitive** names.

Organisations served by **Greenlife Ewaste Recycling Pvt. Ltd.** and its Enterprise ITAD Division, PrivAce Technologies, across banking, insurance, aviation, logistics, media, manufacturing, healthcare and education.

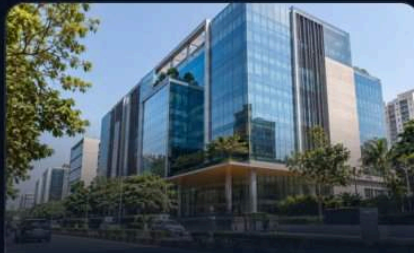

# Built for data-sensitive industries.

The device list is the same across sectors. The exposure is not. These are the environments where documented, certified IT asset disposal earns its place, alongside logistics, media, aviation and healthcare.

## Banking & NBFCs

Customer financial data on a retired laptop is a regulator's first question.

## Insurance

The same data sensitivity as banking, and the same need for certified proof.

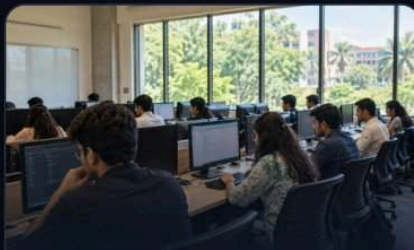

## IT, Software & BPO

Source code, client credentials and call data. The assets on your machines are the product.

## Pharma & Manufacturing

Compliance-driven environments where audit trails are not optional.

## Education

Computer labs retiring in batches, with student and staff records on the drives.

## Real Estate & Design

Project files, drawings and client data on every workstation that retires.
